

HTML Project:

Name:	Roll no.:
Nitin	58
Kevin	59
Rupendra	60

Synopsis:

We are making Interactive Calendar for this ECE-326 Project:

We will use following languages/medium for our Project:

- 1)HTML
- 2)CSS
- 3)JavaScript

The role of the following will be:

1)HTML(Hyper Text Markup Language):-

We will define the structure of our calendar using HTML. All the tags will be defined by HTML.

2)CSS(Cascading Style Sheet):-

The text decoration, Font-style, Font-size and the border of calendar, etc will be taken care by CSS.

3) JavaScript:-

The Interactive part of calendar will be done by JavaScript. Things like making a reminder etc, on Calendar can be defined by Javascript.

All the Logical, Arithmetical and Functional parts require JavaScript.

Tags we may use for Interactive Calendar:

body, p, tr, td, th, li, ul, ol, style, div,
